The Reporting Hub

White Label No-Code Business Intelligence

Platform For Power BI Embedded

Power BI Embedded: Time consuming and complex to deploy

Power BI Embedded is an extremely powerful toolset for analytics delivery but deployment is complex and time consuming. Traditionally, developers are required to build and maintain a custom solution where time-to-market is measured in months.

Primary challenges

Power BI Embedded is a complex developer tool kit which requires extensive coding, integration and time to implement and deploy.

Ideal solution

Allow customers to instantly leverage the extensive benefits of Power BI Embedded without any of the deployment complexity. Accelerate the time-to-market and adoption of embedded analytics solutions.

Desired outcomes

Deliver a personalized white label user experience out-of-the box, while simplifying the implementation process and ultimately reducing deployment time and costs.

The Reporting Hub

A plug 'n' play reporting solution that deploys to your Azure environment and provides an instant customizable delivery platform for your Power BI content utilizing Power BI Embedded with no code or development required.

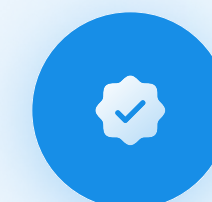

Turn-key web app to deliver Power BI at scale

Accelerate embedded analytics delivery. Go-live with Power BI Embedded in minutes, not months.

Fully customizable white-label solution

Create a custom branded portal for your organization and customers to access their secure Power BI content in minutes.

Secure data access and segregation with multi-tenant content sharing

Create segregation and a customized experience for each of your customers or create a separate application environment for your unique user groups.

The Reporting Hub, Power BI Embedded, and Microsoft Fabric

The Reporting Hub can be self-deployed from the Azure Marketplace into your Azure environment, making use of your Microsoft Fabric service tenant with Power BI workload. Developed following product group best practices and guidance, the Reporting Hub offers scalable multitenancy and a comprehensive range of ready-to-use functionalities, customization and integration options designed to meet a variety of customer needs.

Accelerate Embedded Analytics

Designed to be cost-effective and efficient, reducing the time-to-market for your Power BI embedded analytics solutions, particularly for multi-tenant, customer-facing applications.

Integration Flexibility

The Reporting Hub can function as a standalone application or be fully integrated with your existing application.

Enhanced Personalization and Functionality

Enhance user experience, offering personalized features for Embed for your customers scenarios. This includes flexible options for end-user authentication, multitenancy, and permissions management.

Customer success: Galatea Technologies, delivering customer insights securely

“We chose the Reporting Hub because it allowed us to drastically reduce the time-to-market, technical complexity, and cost to deploy our customer facing Power BI solution. The Reporting Hub team is excellent to work with and has supported us throughout our entire journey. By implementing the Reporting Hub, it allowed us to focus our resources and efforts on our core business and not have to worry about building and maintaining a secure reporting delivery platform.”

- Chad Hayden, CEO, Galatea Technologies

Deliver Analytics-as-a-Service with PBI Embedded

“The Reporting Hub enabled our company to enter new segments of the market. The ability to deliver analytics-as-a-service now meant that we could cater to Tier 1 corporate clients.”

Share to External Customers Seamlessly

“The Reporting Hub makes it easy for us to provide our customers with Power BI reporting in a way that aligns with our corporate identity and existing technologies.”

Reduce Time-to-Market

“The prospect of building our own custom solution using Power BI Embedded was overwhelming and time consuming. Deploying and managing the Reporting Hub is simple and doesn’t require you to be a tech expert.”

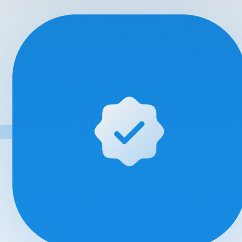

Microsoft Recommends The Reporting Hub!

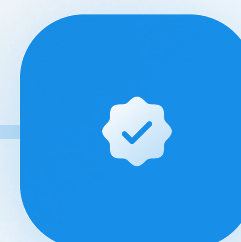

"The Reporting Hub, integral to our Microsoft Power BI Embedded solution accelerator program, revolutionizes how organizations deploy analytics. It significantly speeds up time-to-market by seamlessly integrating with existing authentication systems, simplifying the traditionally complex process. This advanced platform excels in delivering customized, multi-tenant user experiences, while efficiently managing Power BI capacity and billing, making it an essential tool for organizations seeking rapid, personalized analytics for external customers deployment. The Reporting Hub is the epitome of sophistication in analytics, offering unparalleled speed and customization capabilities."

-Ofer Ashkenazi, Microsoft | Principal Program Manager - Power BI Embedded

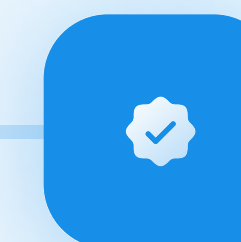

Deployed in over 20 Countries!

The Reporting Hub is a multi-lingual application deployed all over the world in all 6 major continents.

Transactable on Marketplace

Can be installed and purchased directly through the Azure Marketplace with our transactable offer.

Over 3 Years in Market!

Proven in-market solution with continual improvement based on customer feedback for over 3 years
